

Anime 2D-BOX

White Paper

Introduction

In 2022, from digital artwork to virtual land, more and more audio-visual industry enter the NFT market. The NFT-Anime 2D-Box Mall combines the elements of audio-visual industry with the popular animation and manga in the form of blind boxes for both novice and experienced metaverse gamers, improving the aesthetic outlook, quality and collectability of NFT, completely overturning the perception of traditional NFT. The blind box will be released in four different series from 2022 to 2023, and each edition will be increasingly empowered according to the official blueprint, so that NFT is no longer just a picture and a piece of code, but a comprehensive concept that can be a lottery ticket, a share, a deposit box and a ticket to crowdfunding, as you could find the actual projects in detail on the official blueprint.

Anime 2D-BOX NFT

The first release will reward the holders with 90% revenue of the project in the form of a jackpot with six different levels of rarity (first prize, second prize, third prize, fourth prize, fifth prize, and general prize). Holders will be rewarded with different bonuses depending on the rarity. Holders of the second release will be able to participate in the actual operation plan (providing advice, choosing the voting location, becoming an investor). The third release offers GameFI tokens airdrop, as well as the opportunity to meet creators and partners to exchange knowledge, discuss projects and more. In the fourth release, the crowdfunding tickets will be sold. If you have an interesting idea that the project owner recognises, you will be invited to discuss a collaboration with project owners, which will allow you to participate in crowdfunding and take the benefits of the official traffic. Finally, we will enter the realm of metaverse, where all holders of Anime 2D-BOX NFTs will be able to personalise themselves into the metaverse and have their NFTs turned into decorations (a painting or a 3D figurine) in the metaverse.

A2D NFT White List

The number of White Lists will be adjusted according to the number of NFT available. Please visit the official website or Discord channel for further information. The number of Mint is 3 at the time of public sale.

Blind Box Minting and Bonus Collection

White list holders are limited to mint 3 boxes per person, and the blind box is unboxed on the official website at the time of public sale. The jackpot amount will be counted after 3 days, with the airdrop bonus and A2D NFT released at the same time.

NFT and cryptocurrency prize draw

During the promotion period, the official will sponsor in different forms the investment of any A2D white list holder. Popular NFT and ETH draws will be held from time to time, with different discounts depending on the number of white list holders invited, and winners need to prepare the discounted amount and complete the transaction within 3 minutes after winning.

Project Planning

The project will implement a lottery model (90% revenue from the project launch will be returned to the holder in the form of winning bonus), online and offline virtual reality integration (an animation restaurant will be opened for the holder to participate its operation), GameFI (airdrop crypto currency to play games and earn money while collecting NFT), DOA (the holder will propose an idea that the project owner recognises and will work together in the same project, and the holder will be able to participate in the crowdfunding), and entering the metaverse (in the future metaverse world you will be able to become a personalized character and the NFT you hold can become a unique ornament). As the project gets bigger the entrance fee will be increased slowly, players who buy the project at the initial run to enjoy the maximum benefit from their investment.

Highlights

1. The most integrated Asian project in the future blueprint
2. The continuous USDT lucky draw activity during the promotion period (100 USDT per day for white sheets holders, with different rebates according to the number of people invited to the community)
3. Observing the market and buying the popular NFT according to the scale of promotion. The different discounted price will be given to the followers or holders, so that you can select more easily the set of investment in NFT (after winning the bid you can immediately resell in the secondary market)
4. Discounted price of ETH will be given to players who have contributed to the community (small sponsorship for players who follow the official project)
5. High demand for products in terms of aesthetics, quality and collectability
6. Each series offers different rewarding models to its holders (jackpot mode, participation in actual operating projects, interaction with creators and GameFI)

airdrop tokens, qualifications of crowdfunding)

7. Spanning the metaverses, it makes your NFT collections take on a different meaning

8. Structural reduction in the number of public sales and increasing in the amount of admission according to the size of the project to maintain the price of A2D at a constant, with only increases, no declines.

9. Planning with care of the project and protect the interests of the holders of the investment

10. Launching public welfare activities and donating to charitable organisations in the name of consumers

The combination of all of these benefits has eliminated the disadvantages of the NFT market in the past and has significantly increased the future value of the project.

Partnering with us

We are planning to co-brand with others in order to combine more NFT creators or brands who lack of marketing resources. The partners will provide some airdrops and physical merchandise to A2D NFT holders. The Anime 2D-BOX store will help facilitate marketing in order to build a larger community.
